

TECHNICAL DATA

Reimer R7 (THE URBAN)

The Reimer R7, aptly named “The Urban” is a small, compact and highly manoeuvrable mobile batch plant which is effective in high density urban areas such as large towns and cities. The R7 Urban Mobile Batch Plant is not only fitted to standard 6x4 double-drive chassis/cab configurations, but is also suitably engineered to be mounted to hydraulically rear-steered 6x2 chassis’ allowing the mobile plant to be manoeuvred through very tight street and site locations. The hydraulically steered rear lift-axle results in manoeuvrability that matches a standard 4x2 wheel configuration.

VEHICLE SPECIFICATIONS

Capacity.....	6 - 7.6 cubic metres
Production Rate.....	Up to 60 cubic metres per hour
Auger.....	9” diameter
Cement Hopper.....	2.6 tonne capacity
Cement Metering.....	Twin flyte cross augers feeding single screw discharge auger
Water Tank.....	1700L capacity (2300L option)
Hydraulic Pump.....	Load sensing, pressure and flow compensated variable displacement, piston type tandem pump
Controls.....	Wireless remote control, T-Bar wonder lead and main control panel
Vibrators.....	Electric internal central divider mounted vibrator system <i>(external side mount option available)</i>
Delivery Measurement.....	Reimer digital computer <i>(options available)</i>
Batch Plant Power.....	Low noise external power drive engine (Donkey Engine) or PTO option
Chassis Cab.....	New or Used - customer lead option

ADDITIONAL OPTIONS

- ▶ Reimer admixture system
- ▶ Reimer electric easy sheet system
- ▶ Reimer foam generator
- ▶ Fibre feeder - Reimer variable speed spindle type
- ▶ Colour reversing camera with speaker unit
- ▶ GPS telematics management system
- ▶ Auto lubrication system
- ▶ Reimer weighing system
- ▶ Reimer concrete colour feeder
- ▶ Alloy chequer plate safety boards
- ▶ Wheelbarrow rack
- ▶ Water heater
- ▶ Internal protection liner
- ▶ In-Cab printer
- ▶ External safety gantries
- ▶ Tool box
- ▶ Hand wash bowl
- ▶ Pressure washer
- ▶ Full repair and maintenance contracts
