

TECHNICAL DATA

Trailer mounted Mobile Batch Plants

Reimer Trailer mounts, the “RT” range, are available in all the Reimer models and can be bespoke built to specific engineering design applications. Trailer mounted Mobile Batch Plants provide the perfect solution for remote and large site locations. They can be left on-site which is a cost-effective alternative to installing and commissioning an expensive, high maintenance static batch plant and drum mixer.

REIMER RT4

Standard Concrete Capacity 4.4 cubic metres
 Foamed Concrete Capacity..... 6 cubic metres
(option for tandem axle)

REIMER RT7

Standard Concrete Capacity 8 cubic metres
 Foamed Concrete Capacity..... 10 cubic metres
(option for tri-axle)

REIMER RT10

Standard Concrete Capacity 10 cubic metres
 Foamed Concrete Capacity..... 13 cubic metres

REIMER RT12

Standard Concrete Capacity 12 cubic metres
 Foamed Concrete Capacity..... 14.2 cubic metres

Special application mount options

All Reimer models are available on a range of special application mounts for all terrain and water applications. A bespoke specification service is available to all customers with this type of requirement.

TRACK MOUNT - ON / OFF ROAD ALL TERRAIN

MARINE / RIVER BARGE MOUNTS

RAIL TRACK MOUNT

ROLL-ON / ROLL-OFF MOUNT
